# GRAPH THEORY AND COMBINATORICS

Guest Editor: C. Berge

## CONTENTS

Preface 1

*Y. Alavi, J. Liu and J. Wang*
Highly irregular digraphs 3

*B. Alspach and C.-Q. Zhang*
Cycle covers of cubic multigraphs 11

*D. Amar*
Applying a condition for a hamiltonian bipartite graph to be bipancyclic 19

*A. Astié-Vidal and V. Dugat*
Autonomous parts and decomposition of regular tournaments 27

*G. Bacsó and Z. Tuza*
Domination properties and induced subgraphs 37

*L. Balcza*
Sum of lengths of inversions in permutations 41

*J.-P. Barthélemy and J. Constantin*
Median graphs, parallelism and posets 49

*J. Borges and J. Rifa*
A note about multidesigns and extended designs 65

*M. Borowiecki and E. Drgas-Burchardt*
Classes of chromatically unique graphs 71

*C. Carlet*
A general case of formal duality between binary nonlinear codes 77

*Y. Caro and Z. Tuza*
Bounded degrees and prescribed distances in graphs 87

*I.M. Chakravarti*
Geometric construction of some families of two-class and three-class association schemes and codes from nondegenerate and degenerate Hermitian varieties 95

*C. Chameni Nembua and B. Monjardet*
Finite pseudocomplemented lattices and 'permutoedre' 105

*C.C. Chen, K.M. Koh and Y.H. Peng*
On the higher-order edge toughness of a graph 113

*F.R.K. Chung and R.L. Graham*
On hypergraphs having evenly distributed subhypergraphs 125

*R. Cordovil and M.L. Moreira*
A homotopy theorem on oriented matroids 131

*I.P.F. da Silva*
On fillings of 2*N*-gons with rhombi 137

*C. Delorme and S. Poljak*
The performance of an eigenvalue bound on the max-cut problem in some classes of graphs 145

*J. Dénes and G.L. Mullen*
Enumeration formulas for latin and frequency squares 157

*R.B. Eggleton, A.S. Fraenkel and R.J. Simpson*
Beatty sequences and Langford sequences 165

*P.L. Erdős*
A new bijection on rooted forests 179

*P. Erdős, Z. Füredi, J. Pach and I.Z. Ruzsa*
The grid revisited 189

*O. Favaron, M. Mahéo and J.-F. Saclé*
Some eigenvalue properties in graphs (conjectures of Graffiti – II) 197

*E. Flandrin, J.L. Fouquet and H. Li*
On hamiltonian claw-free graphs 221

*A. Frank*
Submodular functions in graph theory 231

*K. Fukuda and K. Handa*
Antipodal graphs and oriented matroids 245

*C. Garcia and P. Solé*
Diameter lower bounds for Waring graphs and multiloop networks 257

*M. Gionfriddo and G. Lo Faro*
2-Colourings in $S(t, t+1, v)$ 263

*H. Gropp*
Configurations and graphs 269

*A. Guénoche*
Enumération des partitions de diamètre minimum 277

*M. Habib, M. Morvan and J.-X. Rampon*
On the calculation of transitive reduction–closure of orders 289

*P. Hansen, A. Hertz and J. Kuplinsky*
Bounded vertex colorings of graphs 305

*P. Hell and K. Seyffarth*
Largest planar graphs of diameter two and fixed maximum degree 313

*A.J.W. Hilton*
Recent results on the total chromatic number 323

*P. Jégou and M.-C. Vilarem*
On some partial line graphs of a hypergraph and the associated matroid 333

*B. Leclerc*
Lattice valuations, medians and majorities 345

*B. Lindström*
On algebraic matroids 357

*N.V.R. Mahadev, P. Solot and D. de Werra*
The cyclic compact open-shop scheduling problem 361

*F. Maire*
Une note sur les contractions dans les polygones orthogonaux 367

*J.F. Maurras*
Hypergraphes de Petersen! Hypergraphes de Moore? 373

*J. Mayer*
Case 6 of Hadwiger's conjecture. III. The problem of 7-vertices 381

*C.J.H. McDiarmid and A. Sánchez-Arroyo*
An upper bound for total colouring of graphs 389

*M. Middendorf and F. Pfeiffer*
Weakly transitive orientations, Hasse diagrams and string graphs 393

*H. Okamura*
Paths containing two adjacent edges in $(2k+1)$-edge-connected graphs 401

*M. Padberg*
Lehman's forbidden minor characterization of ideal 0–1 matrices 409

*R. Palisse*
A short proof of Fisher's inequality 421

*S. Poljak*
On existence theorems 423

*A. Quilliot*
Une extension du problème du point fixe pour des graphes simples 435

*A. Raspaud*
Postman tours and cycle covers 447

*I. Schiermeyer*
Computation of the 0-dual closure for hamiltonian graphs 455

*M. Wagowski*
Coordinatization of B-matroids 465

*Y. Yamasaki*
Shannon-like games are difficult 481

Research problems 485
